

Your day in the app

One screen: **Floor mode**. Log in once, clock in, log what you finish, clock out. That is the whole app for the crew.

Open Floor mode

Get it on your phone

The app is a web page. Put it on your home screen once and it opens like any other app, and it keeps working when the shop Wi-Fi drops.

- 1 **Open `prod-through-inv-3.dan-daf.workers.dev` in your phone's browser.**

Safari on iPhone, Chrome on Android. It opens Floor mode on its own.

- 2 **iPhone: tap the `Share` button, then `Add to Home Screen`.**

Android: tap the `:` menu, then `Add to Home screen`.

- 3 **Open it from the home screen from now on.**

It updates itself. If it ever says the site can't be reached or looks stale, close it and open it again.

Log in

AQ Floor

Log in: tap your name

Alex Joe

John Maria

[Full app \(managers\)](#)

Log in

Tap your name, then type your 4-digit PIN on the number pad.

1 Tap your name.

Only your own. Everything you log and every punch goes under it.

2 Type your 4-digit PIN.

A manager sets it. No PIN yet? The app says "Ask a manager to set your PIN."
Five wrong tries lock you out for 15 minutes.

3 That's it until you log out.

The phone remembers you. Sharing a phone? Tap **log out** at the top right when you're done so the next person logs in as themselves.

Clock in and out

Every punch asks for your PIN

So nobody can punch for you, even on your own phone.

1 Tap the big green Clock in button when you start. It turns red and says Clock out while you're on.

Both ask for your PIN.

- 2 The clock only works at the shop, so the phone asks for your location. Say yes, and keep location on.**

You'll see "Clocked in 7:02am at shop ✓". If it says to turn on location, do that and try again.

- 3 Tap Clock out when you leave.**

Forgot? Anyone still clocked in at **6pm** is clocked out at 6pm automatically.

- 4 Missed a punch, or worked past 6pm? Tap I forgot to punch.**

Pick in or out, today or yesterday, the time and a reason, and enter your PIN. A manager approves it. Nothing changes until they do, and only managers can change times.

 Rescue tube

Job
 Boxed

50" 40"

Standard (not Exo)

-1 24 +1

Floor mode

Making, Job, size, count, Submit. The scoreboard at the top updates as the crew logs.

1 Making: what you're working on.

Rescue tube for tubes and straps. Otherwise pick the chair, foam shape or kickboard by name. The phone remembers your last pick.

2 Job: the station you finished.

Tubes: Cut, Glued, Meshed, Patched, Paint 1, Paint 2, Printed, Straps Attached, Boxed, or Strap made. Chairs: Cut, Assemble, Box. Shapes: CNC, Clean, Box.

3 Tubes only: pick 50" or 40".

The small **Standard (not Exo)** button is for tubes without mesh. Leave it off for Exo. Cut and Glued go on the blank, and Strap made has no size; the app handles both.

4 Count it up: +1, +5, +12 box (tubes only), -1 if you went too far, or type the number.

5

Tap Submit. The bar at the bottom says what was logged.

The screenshot shows a mobile app interface for a worker named Joe. At the top, there's a 'log out' link. Below that, a 'MY DAY' summary shows 'Meshed 0 · Patched 24 · Boxed 24' and 'Boxed/hr: me 7.7 · crew 4.8 · par 1.9'. A prominent red 'Clock out' button indicates 'in since 4:12pm · 3.1 h today'. Below this is a link 'I forgot to punch'. The 'Making' section has a text input field containing 'Lifeguard Chair 50"'. The 'Job' section has a text input field containing 'Assemble'. Below the job field is a quantity selector with '-1', '2', and '+1' buttons, and a '+5' button. At the bottom is a large orange 'Submit' button. A footer link says 'Full app (managers)'.

Chairs and shapes

Pick it under Making, then its own job. No size buttons, no +12.

Log what you finished, at every station.

Glued 50 blanks? Log Glued 50, even if someone else meshes them later. A tube counts at a station when it's done there and ready for the next one.

No signal?

Submit anyway. It waits on the phone and sends itself when the signal comes back.

Fix a mistake

Tapped the wrong thing? Hit **Undo** on the bar at the bottom. It's there for **two minutes** after each Submit and takes back exactly that entry, materials included. It doesn't touch clock punches.

Noticed later? Tell Alex or John. They can reverse any entry. Don't log a negative number or "make up for it" tomorrow.

The scoreboard

- **Crew boxed today / this week:** everyone's boxed tubes against the goal (64 a day, 320 a week). Green is on pace, yellow is close, red is behind.
- **Par now:** where the crew should be right now, based on the hours people are actually clocked in.
- **My day:** what you logged today and your boxed per hour next to the crew's and par.

Ground rules

Your name, your work

Only log what you did, logged in as you.
Log out on a shared phone.

Your PIN is yours

Don't share it. Every punch and log-in uses it.

Finished, not touched

Count a piece at a station when it's done there.

Every station

Each station gets its own number, even if the same pieces go through all of them.

Undo right away

Two minutes on the bottom bar. After that, ask a manager.

6pm

You're clocked out at 6pm. Worked later?
"I forgot to punch".

Questions or something looks wrong: tell Alex or John.

Aquamantor Production · [Open Floor mode](#) · Managers: the manager guide is inside the full app, after you log in.
